PROJECTS

- Lean Applications Individual project : Parking Problem
Studied & suggested that a change in parking angle from 90 to 45 degrees could optimize parking space in our university by 14%.
Cost incurred: Just change of paint.
- Lean Applications group project: Comparative study of two retail chains, Costco and Sam's Club. Objective was to observe and suggest the scope for Lean in their operations and PDCA in order to reduce waste.
Suggestions made: Solar power generation for self sufficiency, extra income and tax benefits, use of mushroom packaging, use of LED lights to reduce utility bills, etc.,
